TECHNOLOGY ENHANCED CARE

Technological Combat Casualty Care

Closing the Care Gap – POI to Role 3

- Polyvalent Monitoring – One Device Multiple Scenarios
- Combat Telemedicine – UN Peace Keeping Missions SOP
- Point of Care Devices – Smaller/Faster/Lighter
- Combat Ultrasounds and Digital Laryngoscopy
- Single Use Mini Defibrillator
- Heavy Lift UAV CASEVAC:
 - Current Platforms
 - NATO Use Case
 - Wearable Monitoring
- Digital Triage and AI for MASCAL

The event is attended by practical demos on realistic simulators. We offer different possibilities to practice by oneself.
